BATH BOMB WORKSHOP

Canton Soap Works, LLC is located in Canton, CT. Barbara Szostek is the maker and instructor with over 10 years of experience making skincare products without using any harmful chemicals.

Her soap making career started when her daughter had an allergic reaction when using commercial soap. She began doing skincare research and discovered that most commercial soaps were made with detergents. These ingredients can cause skin irritations.

Barbara decided to learn how to make plant based soaps for her family and friends instead of using commercial soap. Now she shares this information in her classes.
